Del [22]: [Construction of project website and maintenance for 3 years]

1. Summary

The creation of a website for project Agritexsil (<http://www.agritexsil.eu/>)

2. Introduction

Project website plays an important role for the dissemination of basic idea behind the project and illustrate the project progress. Therefore, we have created an Agritexsil project website (<http://www.agritexsil.eu/>)

The page is updated by UTH.

In addition to the webpage, a Facebook page of the project was also developed at <https://www.facebook.com/agritexsil/>

The page is followed by at least 100 people and is updated by UTH.

Del [22]: [Construction of project website and maintenance for 3 years]

3. Description of the deliverable

The Agritexsil project website was created with a specialized contractor-internet services company (Amoweb). The website is structured in four main sub-menus "The project", "Project Partners", "News & Events" and "Dissemination". Moreover, functionalities to announce job positions, to contact project leaders, to perform in-site search and to be forwarded to the Facebook project webpage are also embedded in the site. A screenshot of the Agritexsil project website is presented in the figure below.
